DISCLAIMER - The Pantone Matching System (PMS) is a system shared world wide by the graphic arts industry and was created to make a uniform standard for spot colors. Please note that every computer monitor varies slightly in color. Since it is not possible to guarantee our color chart will look the same on all computers, we do not guarantee that what you see accurately portrays the color of the actual ink or thread. Please also note that the actual color of the product may vary from the pantone color due to the application of color on different fabrics. Pantone colors are most accurate when applied to a white gloss paper and may look slightly different when applied to other surfaces, such as fabrics, and we cannot be responsible for these differences. To ensure an accurate PMS match, you should consult an actual PMS color swatch book
